

## Data Storage and Business Continuity

**Overview:** In today's dynamic business environments, IT Departments must reliably ensure the operation of their business applications while managing the cost of delivering these applications. Storage is one of the key ingredients to successfully achieve this balance. As businesses share digital systems with employees, customers and suppliers there are ever-increasing volumes of data that must be accessed, held and used in daily operations. Add to that, recent requirements such as HIPPA and Sarbanes-Oxley for storing documents and one can see that scalable data storage is needed.

**NWN is experienced** in working with clients to provide customized solutions for high-speed retrieval of growing applications such as email, database and file/print applications. Our professionally certified engineers assess, design, present, install and can monitor Storage Area Networks (SANs) and Network Attached Storage (NAS), all focused for a secured environment. NWN also realizes the economies of scale achieved with low-priced, hard-disk technology that make SAN and NAS ideal for back-up and disaster recovery.

**NWN provides** a broad range of assessments and services including:

- Storage Networking Assessments and Planning
- Disaster Recovery Planning
- Virtualization Assessments
- File System Assessments
- Email Assessments

- Turnkey Storage Network Deployment
- Data Storage Consolidation
- Site to Site Replication
- Enterprise Backup Design and Deployment
- File System Archiving
- Email Archiving
- Application Acceleration

**Cutting-Edge Knowledge:** Data storage advances have meant that NWN storage solutions and training remain as current as the technology. And while we have chosen best-of-breed storage product partners, we're continuously reviewing emerging products. Whether your needs are for data protection, consolidation, replication, virtualization or application acceleration, NWN is ready to help.

An NWN Corporation Account Executive will be happy to provide more information on this or our other solutions and services. In addition to Data Storage and Business Continuity, NWN offers solutions in Unified Communications; Enterprise Computing which includes Physical Infrastructure, Network Infrastructure, Systems, and Wireless; Information Security and Application Development. After deployments NWN can support your IT operations with our Business Solutions, Professional Services, nCare™ Managed Services and IT Staffing. We have branches throughout the United States which can be seen on our website in the About Us, Locations section.
