

Enterprise Computing — Systems

Overview: With today's reliance on the network to maintain business continuity, the many facets of networks need to be integrated for optimum efficiency. The systems services, provided by NWN Corporation, are different than those provided by many systems integrators because of the depth and breadth of services offered and the best-of-breed products from which solutions can be designed.

Services Offered: NWN provides a broad range of assessments and services including:

- Assessments and Planning
- Disaster Recovery Planning
- Virtualization Assessments
- Email Assessments
- Exchange 2007 Migrations and Deployment including Unified Messaging
- Active Directory Migrations and Deployment
- Desktop Imaging and Deployment
- Group Policy Design to help secure environments
- Patch Deployment and Management
- Application deployment
- Server and Application Monitoring
- Server Consolidation
- Branch Office Implementation
- Application Acceleration
- Application Delivery
- Application Virtualization

The Installation Process: Each installation begins with a pre-implementation meeting designed to address physical requirements, configuration and provisioning needs, and establish timelines. NWN will perform a knowledge transfer to the customer support staff in order for proper on-going support. Complete documentation will also be given to the customer detailing the entire NWN installation.

System Advances: Systems solutions and best-of-breed vendors have continued to evolve over time and NWN has kept up with these advances. Whether a company's needs are for Active Directory, Exchange messaging, server consolidation, patch management, server and application monitoring or virtualization, NWN engineers are ready to help. And as technology changes, NWN works with our existing customer base to recommend the best solutions a business's needs while guaranteeing as much investment protection as possible in the ever-changing technology world.

For more information: An NWN Corporation Account Executive will be happy to provide more information on this or our other solutions and services. In addition to Enterprise Computing Systems, NWN offers solutions in Unified Communications; Enterprise Computing which includes Physical Infrastructure, Network Infrastructure, Data Storage and Business Continuity; Wireless; Information Security and Application Development. After deployments NWN can support your IT operations with our Business Solutions, Professional Services, nCare™ Managed Services and IT Staffing. We have branches throughout the United States which can be seen on our website in the About Us, Locations section.
