

IT Staffing

Overview: In today's business world most IT Departments are stretched thin. Staffs have been asked to deliver more technology— even advanced technologies – with fewer resources. Being stretched thin, it's difficult to have sufficient staff to support the existing environment, handle projects, cover extended leaves of absence and find new employees.

The NWN IT Staffing division provides businesses throughout the US a way to meet these supplemental staffing needs. We attract and employ contractors with a variety of skill sets for all aspects of the network. We can provide qualified IT professionals for short- to long-term engagements and even temporary to permanent employment.

The NWN difference is that our IT Staffing division is part of a successful systems integration company, enabling us to better understand our contractors' skills and our clients' needs. We work hard to retain our contractors, providing benefits as well as continued training and support so they will truly feel part of the "NWN Team."

When our contractors are on-site they generally fit in well with a client's business environment. NWN contractors have access to both our in-house support organization as well as access, through us, to all major manufacturers of current and legacy systems. And a real value for our clients is optional 7x24 support from the NWN Command Center. When an NWN contractor has a question the answer can be just a phone call away.

The most popular skill sets placed include:

- 24x7x365 Phone Support
- Network Design and Implementation
- Network Operation Center

- Microsoft OS and Exchange Migration
- Novell, ZenWorks and GroupWise
- LAN/WAN Administration
- Desktop Support
- Help Desk Staffing
- Project Management
- UNIX, SUN Solaris and AIX
- Programming and Application Development

For more information: An NWN IT Staffing Account Executive will be happy to provide more information on this or other solutions and services. In addition to IT Staffing, NWN Corporation offers solutions in Unified Communications, Enterprise Computing which includes Physical Infrastructure, Network Infrastructure, Systems, and Wireless; Data Storage and Business Continuity; Information Security and Application Development. After deployments NWN can support your IT operations with our Business Solutions, Professional Services, nCare™ Managed Services and IT Staffing. We have branches throughout the United States which can be seen on our website in the About Us, Locations section.
