

Virtualization

NWN is a leading provider of virtual infrastructure technologies, having delivered superior services around virtualization and Data Center automation for many years. Infrastructure virtualization provides business benefits such as server consolidation, creating significant up-front and on-going savings, potentially eliminating the need to buy additional server hardware as well as costly add-ons such as Storage Area Network (SAN) connections and air conditioning units. Server consolidation also has a powerful positive impact on electricity costs, while minimizing the data center space needed to house the servers. That's good news for any enterprise with a serious "Green IT" initiative!

NWN which has certifications in many virtualization technologies, will assist you in designing and implementing virtualization solutions in conjunction with our other services such as storage, data center automation, security, and regulatory compliance. Our goal is to facilitate building a scalable, cost effective, and secure IT environment. We specialize in helping organizations utilize the unique aspects of virtualization technology to solve common IT challenges in new and dynamic ways.

Whether due to a lack of available resources or experience, even IT Directors and CIOs find it difficult to determine which approach provides the best and most cost-effective solutions for their businesses. NWN offers top-notch consulting talent and implementation expertise to bring about the benefits of virtualization. NWN stands out as we have

honed partnerships with the world's best hardware and software vendors in virtualization technologies, yet frequently deliver the most cost-effective solutions via optimizing clients' current IT assets.

Our areas of concentration include:

- Infrastructure analysis and design
- Data center consolidation and containment
- High availability environments
- Remote office
- Infrastructure automation
- Business continuity and disaster recovery solutions

For more information: An NWN Corporation Account Executive will be happy to provide more information on all solutions and services. In addition to Virtualization, NWN offers solutions in Unified Communications; Enterprise Computing which includes Physical Infrastructure, Network Infrastructure, Systems, and Wireless; Data Storage and Business Continuity; Information Security; and Application Development.

After deployments, NWN can support your IT operations with nCare™ Managed Services and IT Staffing. We have branches throughout the United States which can be seen on our website in the About Us, Locations section or email nwninfo@nwnit.com.
