Managed Print Solutions

## Improve ROI, Stability and Visibility for your Print Environment

### *Our Solutions*

Managed Print Services are a suite of scalable and flexible solutions—customer or NWN managed—that are designed to adapt to your changing business needs. Whether you need to print from the office or on the road, from a desktop or a mobile device, MPS will help. You'll save costs, improve stability, and enhance visibility for your print environment. MPS offerings include everything from imaging and printing devices, supplies, and software, to support, services, and workflow solutions. How can MPS help your business?

- Significantly reduce single-purpose devices by strategically placing multi-function devices
- Remove the hassle of storing extra supplies and the expense that goes with them with just-in-time ordering
- Reduce your Capex cost with a more stable and predictable Opex
- Add security for printing sensitive and confidential information

### *Why NWN and HP*

NWN and HP will help you can gain visibility and control of your entire document environment. Based on what we learn, we will work with you to create a plan to optimize and manage your printing needs moving forward. Our multiple step approach to managed print services includes: assessment, optimization, purchase, implementation, training, maintenance, support and monitoring. Our comprehensive service provides you with the flexibility of choosing some or all of these services.

## Our Approach

NWN will take time to understand your unique print requirements and recommend a solution that is tailored for your needs. NWN specializes in:

- **Lower Print Costs:** Your business can decrease overall annual printing costs by implementing a managed print strategy that delivers accurate insight, intuitive setup and training, and efficient practices and processes.
- **Support Multi-Vendor Environments:** Your business will be able to manage and deploy devices and supplies from multiple vendors in a more convenient and efficient way, making it easier to control associated costs.
- **Manage Devices and Page Volumes:** Your business will be able to track exactly how many devices are deployed and the page volume on each product, and can easily stay up to date on how well printer capabilities match page volume and user needs.
- **Optimize Imaging and Printing Devices:** Your business will be able to ensure the right devices are being used for the right functionality by centrally managing your imaging and printing fleet. This can also reduce device downtime.
- **Increase Productivity:** Your business will be able to decrease the amount of involvement employees have in the support and management of your imaging and printing environment, allowing them to focus on more important responsibilities.

- Security
- NCare Managed Services
- NPro Professional Services
- NForce Staffing Services
- NCloud Services
- Hosted, On-Premise and Hybrid

## Relieve Your Printing Pain Points

In many organizations printer costs tend to spiral out of control because they are not managed centrally and in some cases completely unmanaged. NWN can help you control the common print pain points including:

- **Unknown Printing Costs:** Unknown costs crop up if you don't have an accurate inventory of devices. An in-depth assessment of imaging and printing costs can give you a much clearer picture of your overall budget.
- **Unmanaged Supplies and Inventory Strategy:** Excessive supplies inventory can create aggravating and time-wasting employee efforts to find the right supplies as well as clutter space needed for more essential purposes. A refined printing supplies service and strategy can virtually eliminate IT and employee involvement.
- **Over-reliance on IT for Strategic Support:** Relying on IT managers to provide support for your entire imaging and printing fleet can take up too much valuable time from a core part of your business and leave you without a strategic imaging and printing lifecycle management plan.
